

# Tender Loving Care Cannula

Salter design innovation. The long-term "wearability" cannula.

Foam cushions adjust easily for a comfortable fit and less chafing and tissue injury over the ear. Hospital-acquired pressure ulcers (HAPUs) are difficult to heal, costly to treat, and no longer reimbursed by CMS. Prevention is your best opportunity for management. Salter's TLCannula™ is designed to alleviate problems in the most common location for device-related pressure ulcers—the ear.

### Salter Features

- Ultra-soft, grey foam cushions, curved and conformed to the tubing around the ear
- Unique, patented face-piece design
- Available in dual port demand style
- Cushions made of closed-cell foam

### Problems solved

- Softer touch
- Less pressure
- Kink resistant, 3-channel tubing
- Comfortable feeling, regardless of position
- More natural "fit"
- Reduced patient anxiety
- Maximum comfort for long-term oxygen therapy patients
