

Rectocam

The Rectocam systems are simple and versatile and allow to evaluate the rectum and the anal canal from a “new observation point”. By connecting the camera’s to an external video device (Monitor/PC/Laptop/Tablet/Smartphone) the specialist can observe the images directly on the screen and formulate an accurate diagnosis. Their pairing with light sources, photo printers, gauges, electro-scalpels or echographs make them autonomous and portable proctological devices.

Each Rectocam device is coupled to a practical, functional and intuitive software able to record videos, sound and still images made during the visit in your patient database.

Thanks to their exclusive fenestrated adapters, Rectocam cameras allow to preform biopsies during an anoscopy.

The Rectocam Wi-Fi is a portable digital system for HD video magnifying whose technical and ergonomic have been optimized for its usage in the medical field and in particular, for the study of the anal-rectal mucosa in procedures like HRA (High resolution Anoscopy). But this is not it. Its compact dimensions, the possibility to visualise images on a smartphone through a dedicated free app and the highly reduced costs, make Micro Rectocam Wi-Fi a solution available to all the specialists willing to offer a complete service to their patients anytime.

The acquisition and storage of images and videos during diagnostic and surgical activity is a practice which has become more and more popular in the last few years. Thanks to the development of dedicated technologies, it is now an operative standard to examine the pathological situation of a single patient and to evaluate the most suitable therapeutic approach, deliberating with department colleagues of specialised centres elsewhere. At the same time, production of scientific evidences intended not only for the research or for the didactics but also for the elaboration of medical/legal support made the presence of advance IT video instruments extremely necessary.

Product Code	Description	QTY
EM200SW	Micro Rectocam Wi-Fi	Each
A.4002	Connector for rectoscope grip and Video camera	Each
A.4001	Connector for Self-Light and video camera	Each
