

## SurgiSafe - Absorbent Floor Mats

### Managing a wet floor

Aspen Fluid Management Solutions are a range of products designed to help keep healthcare staff safe by reducing the chance of slips, trips and falls due to wet floors, particularly during fluid intense procedures.

The range includes Surgisafe Absorbent Floor Mats and Quiet Floor Suction Devices. They are cost-effective alternatives designed for easy set-up, ease of use and disposal, therefore assisting with faster operating room turnaround times.

### Reduce Slips, Trips & Falls

Slips, trips and falls on wet floors are identified as a major problem and can cause significant injury to hospital staff and substantial costs to the organisation.

Placing the appropriate size and type of Surgisafe Mat or Quiet Floor Suction Device around the operating table or in the scrub area before a procedure starts, will allow any soap solutions, irrigation fluids, blood, body fluids, skin preps or caustic agents that are dropped onto the floor to be quickly and easily absorbed. This ensures that the floor is safe and slip free and also reduces the potential risks associated with contaminated fluid and infection.

### SurgiSafe® Specialty Absorbent Floor Mats

- Designed to include unique features beyond those offered by the Standard Absorbent Floor Mat Line
- Low profile
- Offered in large sizes
- Blue mat features fluid barrier backing to help keep floor beneath dry and clean
- Yellow mat absorbs fluid from the top and bottom
